Business, Self-Development, Psychology, Entrepreneurship

Summary

Full-stack Web Developer specializing in modern JavaScript technologies, particularly React and Next.js. Experienced in building scalable web applications, custom websites, and CMS-driven platforms for business clients. Skilled in designing and developing both frontend interfaces and backend systems, with a strong focus on performance, usability, and clean architecture. Passionate about creating reliable digital products and continuously improving development workflows.

Education

State University of Applied Sciences in Legnica	Bachelor of Engineering (BEng)
Computer Science	Legnica, Poland • 2018 - 2021

Experience

Connectico	Wrocław
Frontend Developer	2020-2021

Technologies: React, Next.js

- Developed a **generator for creating online stores** using React and Next.js.
- Managed the **full project lifecycle**: business requirements, UI design in Figma, development, and deployment.
- Built responsive and scalable frontend architecture.

Empik	Warszawa
Frontend Developer	2021-2025

- Migrated legacy monolithic applications to a **microfrontend architecture**, extracting and rebuilding features using React and Next.js.
- Developed and maintained **merchant-facing tools and administrative panels** for managing platform features and configurations.
- Managed **application deployment, configuration, and environment setup**.
- Maintained and refactored parts of the **legacy codebase** built with **Angular and Freemarker**, ensuring stability during the transition to modern technologies.

Inpost	2025 - current
Frontend Developer	

Technologies: Next.js, React

- Developed the **frontend layer of the centralized authentication platform (OIDC / OAuth2)** used across InPost services.
- Built authentication flows used as a **WebView inside the mobile application**, including Google and Apple sign-in integrations.
- Contributed to a **centralized login, registration, and onboarding system** used across multiple countries and services within the InPost ecosystem.
- Developed **self-service tools for customers and back-office applications** for internal teams.
- Participated in building and maintaining the **company Design System**, creating reusable UI components and standards.
